STOREVAN ORANGE PLANET - STOREVAN ORANGE PLANET

**STOREVAN ORANGE PLANET**

Nachhaltigkeit und ökologische Entwicklung sind Themen von großem, aktuellem Interesse, entstanden durch das steigende Bewusstsein, dass auf die Umweltbalance aufgrund der zyklischen Veränderungen und Erneuerungen geachtet werden muss.

STOREVAN ORANGE PLANET

Environmental sustainability and eco-compatible development are topics of great interest and relevance, arising from the growing awareness that it is important to pay attention to the environmental balance.

ZERTIFIZIERUNGEN - CERTIFICATIONS

ZERTIFIZIERTE PRODUKTION

- Nach ISO 9001:2015 zertifiziert.
- Erfolgreicher CRASH TEST durchgeführt nach ECE-R17 mit einer Aufprallgeschwindigkeit von 50 Km/h.
- GS-Zertifizierung für Inneneinrichtungen und Laderampen.
- GS-Zertifizierung für Dachträger und Leiterträger.

CERTIFIED PRODUCTION

- ISO 9001:2015 certified.
- Brilliantly passed the CRASH TEST carried out according to the most recent European regulations ECE-R17 with impact at 50 Km/h.
- GS certification for interior fittings and loading ramps.
- GS certification for roof and ladder racks.

CRASH TEST
ECE-R17

StoreVan ist weltweit der einzige Hersteller von Nutzfahrzeugeinrichtungen, der mit dieser Technologie arbeitet.

StoreVan is the sole LCV's equipment manufacturer worldwide to make use of this technology.

GALVANNEALED STAHL

Galvannealed Blech ist eine Variante von feuerverzinktem Blech. Das Produkt unterliegt einem Feuerbeschichtungsprozess und wird bis ca. 550 °C erhitzt. Dies ermöglicht es dem Zink mit dem Stahlblech eine Legierung einzugehen. Das Ergebnis ist eine Beschichtung mit einer gleichförmigen, feinkörnigen Kristallstruktur an der Beschichtungsoberfläche und einer **sehr hohen Oberflächenqualität und Korrosionsbeständigkeit**.

Dieses Verfahren ist ideal für Automotive Anwendungen. StoreVan hat diese Technik nun auch im Bereich Nutzfahrzeugeinrichtungen implementiert.

DAS VERFAHREN DER KATHODISCHEN ACRYL-TAUCHLACKIERUNG

Die kathodische Acryl-Beschichtung ist eine Oberflächenbehandlung, die den einzelnen Teilen der Einrichtung eine **extrem hohe Korrosionsbeständigkeit** verleiht. Das Tauchverfahren gewährleistet eine **gleichmäßige Beschichtung** und einen lang anhaltenden Schutz egal gegen welche Stoffe. Das Acrylharz schützt den Lack bei direkter Belichtung durch die Witterung gegen Ausbleichen und gegen Veränderungen der Korrosionsbeständigkeit.

- Korrosionsbeständigkeit von über 500 Stunden (ASTM D1735 Luftfeuchtigkeit)
- Ausgezeichnete Härte mit einem Mindestrating von 2H

GALVANNEALED STEEL

Galvannealed sheet is a variant of hot-dip galvanized sheet. The product is subject to a hot-dip-galvanization process and subsequently heated to approximately 550°C, combining the zinc with the sheet surface to make an alloy with iron. The result is a uniform zinc coating with a fine-grained crystalline structure along with a **much higher surface quality and corrosion resistance**. This process is ideal for automotive applications. StoreVan introduced and implemented this technology in the commercial vehicles equipment field.

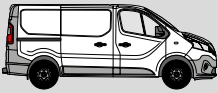

CATHODIC DIP PAINTING WITH ACRYLIC RESIN

Cataphoresis painting is a paint surface treatment able to give the equipment elements a **remarkable resistance to corrosion**; characterized by **uniform deposit** of an acrylic resin on the element surface, it ensures long lasting and high protection against chemical agents and other types of surface attacks. The acrylic resin allows a direct exposure to atmospheric agents without altering its technical features. This process ensures an increased protection against rust.

- Corrosion resistance of more than 500 hours (humidity ASTM D1735)
- Excellent hardness with a minimum rating of 2H

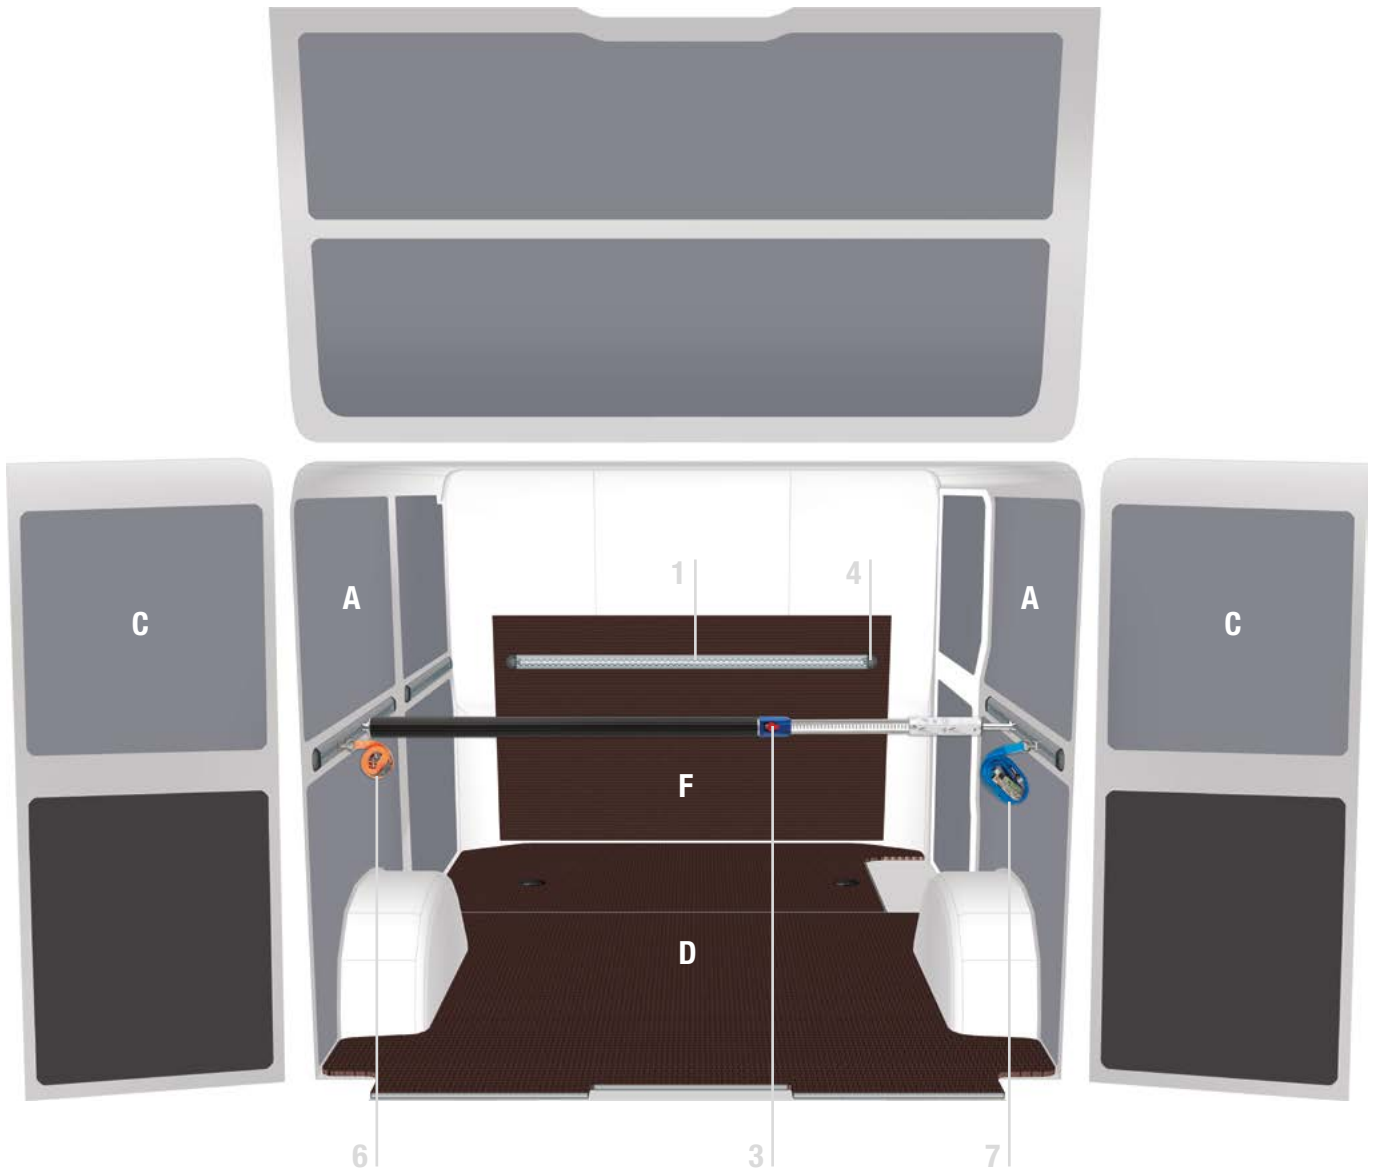

NISSAN NV300

KASTENWAGEN - PANEL VAN

BODENPLATTE UND SEITENVERKLEIDUNGEN - FLOORING AND LININGS

- Bodenplatte und Seitenverkleidungen für Fahrzeug mit rechter Schiebetür und Seitenwänden aus Vollblech.
- Flooring and linings for right side door vehicle with metal sheet sidewalls.

BODENPLATTE UND SEITENVERKLEIDUNGEN - FLOORING AND LININGS

PAN

- Seitenverkleidung aus Polypropylen für:
 - linke Seitenwand
 - rechte Seitenwand und Schiebetür
- Polypropylene linings for:
 - LH sidewall
 - RH sidewall and sliding door

PAR

- Seitenverkleidung aus Polypropylen für:
 - oberen Teil der Heckflügeltüren
- Polypropylene linings for:
 - upper part of rear hinged doors

PIL

- Bodenplatte aus Multiplex mit Phenolbeschichtung, Stärke 12 mm, für das Originalverankerungssystem des Fahrzeugs vorgebohrt.
- 12 mm thick wooden flooring with phenolic coating set for the vehicles original anchoring system

PIR

- Kabinenrückwandplatte aus Multiplex mit Phenolbeschichtung, Stärke 12 mm
- 12 mm thick wooden bulkhead panel with phenolic coating
